Steep downhill with sharp curves. Speed cautions!

In spite of its short distance, with lots of ups and downs, this course cannot be navigated without a gear transmission. If you don't have one, use a rental bicycle from Elm Highlands Family Camp Village. There is a long uphill road around the end of this course. If you have children with you, you might want to avoid it by taking the following shortcut: turn left at point No. 4 instead of going down to the National Highway.
